

**LPG Direct was formed as a direct response to the increasing demand from customers for an LP Gas supplier who could offer personalised customer service, reliability, and a high level of health and safety as standard whilst combining year-round low-cost prices that genuinely reflect the market.**

LPG Direct operate in the industrial, commercial and domestic market sectors. This gives us a wide breadth of both knowledge and skills, seldom found in just one organisation.

From the very first moment of contact you can be sure that LPG Direct are looking after you with a personalised touch. We can provide technical advice on any of the many LPG Vessels we supply and offer a free site survey to establish your full on-site requirements.

We offer the full range of LPG vessels manufactured by the market leaders. All the LPG vessels and equipment provided are ordered specifically for your requirements.

All our installations are carried out by highly qualified engineers and are installed in accordance to the latest industry standards and regulations.

The LP Gas supply will be delivered by a trained operative on one of our fleet of delivery vehicles. At the time of each delivery a comprehensive check on the installation is carried out as part of our ongoing commitment to health and safety within the industry.

LP Gas supplies can be ordered on an "On Demand" basis or by our ever popular "Top-Up" delivery service which removes the worry of ever running out of gas and allows you to get on with running your home or business. We also offer telemetry fuel level monitoring systems on all our installations as required.

Here at LPG Direct we promise to look after your business or home from day one and are confident that we can achieve big savings on your annual LP Gas expenditure.

At LPG Direct we wish to be seen less as a supplier of LP Gas and more as a trusted partner in the energy markets delivering the LPG Direct difference to our valued customers.
